SKILLS

- BACKEND
- Java
 - Kotlin
 - Spring Boot
 - Spring Security
 - Spring AI
 - JPA / Hibernate
 - Python
- FRONTEND
- Angular (v15+)
 - TypeScript
 - React.js
 - JavaScript ES6+
 - HTML5 / CSS3
- EVENT-DRIVEN & APIS
- Microservices
 - Kafka
 - RabbitMQ
 - REST APIs
 - JWT / OAuth2
- AI CODING TOOLS
- Claude Code
 - GitHub Copilot
 - ChatGPT
 - MCP
 - LLM APIs
- CLOUD & DEVOPS
- Azure
 - AWS
 - GCP
 - Docker
 - Kubernetes
 - GitHub Actions
 - Jenkins
- DATA & TESTING
- PostgreSQL
 - MySQL
 - Redis
 - MongoDB
 - JUnit
 - Mockito

EDUCATION

Bachelor of Computer Science (B.C.Sc.)
University of Computer Studies (Mandalay)
· 2020

CERTIFICATIONS

Google Cloud Digital Leader
OCI Architect Associate
OCI Foundations Associate
OCI AI Foundations Associate
Oracle AI Database Foundations

AWARDS

Collaboration Team Award · NTT DATA, 2025
Support Team Award · NTT DATA, 2024

LANGUAGES

English — Fluent

HTET NAING AUNG

Full Stack Developer · Java · Kotlin · Angular · AI

Event-driven microservices · Secure APIs · Financial services & banking · Cloud-native

PROFILE

AI-experienced Full Stack Developer with nearly 6 years of experience building event-driven microservices, secure APIs, and modern Angular front-end applications with Java, Kotlin, and Spring Boot for financial services, banking, ERP accounting, and e-commerce platforms. Uses Claude Code, GitHub Copilot, and ChatGPT hands-on every day, and defined team standards for reviewing and validating AI-generated code. Experienced with Kafka, RabbitMQ, Docker, Kubernetes, Azure, and AWS in international Agile teams.

EXPERIENCE

Full Stack Developer (Java, Kotlin, Angular)

Jul 2025 – Present

Confidential Start-up (Myanmar & Thailand) · Remote, Part-time & Freelance

- Develop full-stack features with Java, Kotlin, Spring Boot, and Angular (v15+)/TypeScript, from API design to reusable UI components.
- Build secure RESTful APIs with Spring Security, JWT, and OAuth2, integrating third-party services.
- Use Claude Code and GitHub Copilot daily for code generation, refactoring, unit testing, debugging, and documentation.
- Defined team AI standards: AI-generated code must pass unit tests, security checks, and code review before production.
- Built Claude Code skills, MCP servers, and prompt templates; integrated LLM APIs with Spring AI for AI-powered features.

Backend Engineer (Java)

Jun 2022 – Jun 2025

NTT DATA Myanmar Co., Ltd · Banking, E-Commerce & Logistics · Onsite

- Developed Java/Spring Boot services and secure REST APIs for a banking project with strict security and data-accuracy standards.
- Built event-driven microservices with Apache Kafka for high-volume e-commerce, logistics, and banking applications.
- Deployed cloud-native services with Docker and Kubernetes on AWS, GCP, and OCI via Jenkins and GitHub Actions CI/CD.
- Implemented resilience patterns (circuit breakers, retries, timeouts) and Redis caching for reliable, low-latency services.
- Adopted GitHub Copilot and set validation practices for AI-generated code via code reviews, JUnit coverage, and static analysis.
- Built React.js/TypeScript internal tools and mentored junior engineers across international Product, QA, and DevOps teams.

Full-Stack Software Engineer (Angular + Java)

Dec 2020 – Jun 2022

METATEAM MYANMAR Co., Ltd · ERP System · Onsite

- Built full-stack ERP modules for financial accounting, procurement, sales, and inventory with Angular, TypeScript, Spring Boot, and PostgreSQL.
- Created reusable Angular components and REST APIs with Spring Data JPA and Hibernate.
- Secured financial data with role-based access control and validation; tuned SQL for high transaction volumes.
- Automated build, test, and deployment with Jenkins and GitLab CI/CD in Agile/Scrum sprints.

How I use AI: Claude Code and Copilot speed up scaffolding, tests, refactoring, and debugging — every AI-generated change is reviewed, tested, and validated like hand-written code.
